# 浙江庆元香菇文化系统

Qingyuan Mushroom Culture System in Zhejiang Province

剥花法传承

香菇始祖吴三公祭祀大典

菇民戏表演

庆元香菇博物馆

浙江庆元香菇文化系统是自 800 多年前香菇始祖吴三公（1130-1208）在庆元龙岩村发明剥花法生产香菇以来，庆元菇民依托良好的生态环境和丰富的森林资源，形成的包括森林可持续经营、香菇栽培与加工技术、香菇文化和地方民俗在内的农业文化遗产系统。

The Qingyuan Mushroom Culture System in Zhejiang province could be dated back to over 800 years ago, when the first ancestor of mushroom, Wu Sangong (1130-1208), invented the Chop Flower Method in Longyan village of Qingyuan. Relying on good ecological environment and abundant forest resources, it formed an agricultural heritage system including forest sustainable management, mushroom cultivation and processing techniques, mushroom culture and local folk culture.
