

Korea Important Fisheries Heritage System No.4

Sinan Sea Salt

Name. Sinan Sea Salt

Date of Designation. October 20, 2016

Location. Docho-myeon, Sinan-gun, Jeollanam-do, Republic of Korea (29.7km²)

Features.

Sinan Sea Salt

Sinan Sea Salt has been a traditional operation since 1947.

The way this tradition technique works is to, first draw seawater to salt pans, and then let the seawater evaporate with the help of natural winds and sunlight. What is left in the salt pans is salt.

The people in this region has survived through many hard times by bartering salt extracted by this traditional operation.
